

LSC Activity Costs Website Launched

The LSC has launched a website dedicated to informing LSC stakeholders of ongoing funding policy changes and rates. The Activity Costs Information website is designed to support ongoing work by the LSC and its partners to establish an evidenced-based methodology for reviewing rates for employer-responsive provision.

It has been created for use by Sector Skills Councils, Providers and other National Stakeholders. The website contains background information and a description of the policy context of the review and the model behind it. The final reports for all the Apprenticeship Frameworks included in the full review are also available on the Activity Costs Information website. To visit the website click [HERE](#) or the link on the Useful Links page.
